## Catherine Greene

Catherine Greene is an established figurative sculptor working in bronze and latterly mixed media. Her use of symbolically resonant imagery and iconography charges her work with an emotional resonance that captivates viewers. The figures she depicts are engaged in a profound dialogue with their surroundings or one another. Greene's ability to establish the presence of her figures in the context of the sensual and often surreal world they inhabit has garnered her widespread acclaim and international recognition. Through evocative imagery and technical craftsmanship, Greene continues to enrich the artistic landscape.
